-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION*****Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 9, 11, 13, 15, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 20010022644 (644).

Per claims 1, 4 and 9, 644 teaches a card comprising: a display device comprising a first semiconductor element comprising a first polycrystalline semiconductor film [TFT in pixel section and see paragraph 162]; a first thin film integrated circuit comprising a second semiconductor element comprising a second polycrystalline semiconductor film [the analog switch TFT]; a first substrate [130]; and a second substrate [135], wherein the display device is electrically connected to the first thin film integrated circuit [pixel 144 is connected to pixel TFT], wherein the thin film integrated circuit and the display device are sealed with a resin between the first substrate and the second substrate of the card [L in figure and figure 19 show the circuit sealed by seal 19], and wherein the first substrate and the second substrate comprise a plastic material [see paragraph 125]. 644 lacks the seal made from resin. However, it was well known to use resin seals for simplifying manufacturing. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of invention.

Per claim 5, 644 teaches a card of claim 1 further comprising a second integrated circuit wherein the first and second thin film integrated circuits are laminated [each TFT is laminated onto the substrate].

Per claims 13, 15 and 17, 644 teaches a card according to claims 1, wherein the card is an IC card [see paragraph 179].

Per claims 2, 3 and 11, 644 teaches a card according to claim 1, but lacks the card having a thickness from 0.05 mm through 1.5 mm, a passive matrix and being a light emitting device. However, each of these limitations were well known because of the

Art Unit: 2871

desire to create lighter cards, decrease manufacturing costs and reduce thickness by removing the light source, respectively. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of invention.
